Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM  
THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 30 is rejected under 35 U.S.C. 102(b) as being anticipated by Gram.

The Gram reference discloses the claimed method at column 2, line 58-column 3, line 28.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 13, 16, 17, and 34-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Leonard in view of Frye.

The Leonard reference discloses a portable liquid oxygen system comprising an insulated container 11 and a delivery/fill system 62/63 including sleeve 55, but does not disclose a conserver. However, attention is directed to the Frye reference, which discloses a similar system including a conserver 42 to ensure that oxygen at the proper

pressure of oxygen flows to the patient. It would have been obvious to one of ordinary skill in the art at the time the invention was made to employ a conservor with the Leonard system in view of the teachings of Frye to ensure that oxygen at the proper pressure flows to the patient. Regarding claims 34-37, the claimed methods are inherently performed during the normal use of the modified Leonard device.

### ***Allowable Subject Matter***

Claims 1-12, and 21-29 are allowed.

Claims 14, 15, 18-20, 31-33, 38, and 39 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
